PROJECTS

Lietuva Travel — PHP web app for planning trips to Lithuania (in progress, in collaboration with Vilnius University)
Source code

- **Problem solving:** validated flights, hotels, weather and budget step by step to build one feasible trip plan
- **Live data:** integrated the Open-Meteo weather and Frankfurter exchange-rate APIs into the planner
- **Testing discipline:** wrote 15 automated unit tests, including checks of core functional-programming properties (functor, monad, monoid laws), to keep the trip-building logic correct as it grew
- **Multilingual:** delivered the interface in English, Spanish and Lithuanian
- **Collaboration:** developing it together with Vilnius University

Tech: PHP, JavaScript, HTML/CSS
